EDUCATION

2020-2023
HIGH SCHOOL

- Colégio Estadual Jardim Gisele

2024 - PRESENT
BIOPARK

- Software Engineering
- 4th Period

SKILLS

- Problem Solving
- Teamwork
- Adaptability and Flexibility
- Continuous Learning
- Critical Thinking
- Good Coding Practices
- High Creativity

LANGUAGES

- Portuguese (Fluent)
- Spanish (Fluent)
- English (Intermediate)

PROFILE

Born in Terra Roxa, Paraná, Brazil, on February 5, 2006, I've been passionate about technology since childhood, especially the gaming world. My journey in the field began in 2014 with the creation of mods and plugins for Minecraft servers, evolving into the development of Discord bots, website building, personal projects, and small businesses. Currently, I'm fully focused on web development.

I'm proactive and self-taught, always seeking to learn new technologies and apply creative and efficient solutions to solve complex problems. I have solid experience in Node.js, JavaScript, TypeScript, Next.js, React, Python, and Git, as well as working with GraphQL, CSS-in-JS (such as styled-components and Tailwind CSS), animations with Framer Motion, and application deployment using platforms such as Vercel and Netlify.

I also work with databases such as MongoDB, PostgreSQL, MySQL, and MariaDB, in addition to working with infrastructure and services on AWS. I also have knowledge of C and Java. My focus is to deliver experience, performance, and innovation in every project I undertake, with technical responsibility and attention to the quality of the final product.

WORK EXPERIENCE

Hagap   2023-PRESENT
FullStack Developer

- I work on developing web and desktop systems that automate and simplify internal processes, focusing on team management, issuing invoices, organizing documents, and creating custom forms.

Ativa EPIS   2023
E-commerce Specialist

- Online inventory control: monitored and updated system levels, preventing stockouts and ensuring availability.
- Store visual maintenance: created and updated banners, visual adjustments, and images, maintaining the online store's aesthetic and identity.

ZERO AO UM   2021-2022
Project student

- I was recognized as the top student in the "Zero to One" Class 2 project, sponsored by Biopark Educação, which aimed to introduce participants to basic programming concepts. Thanks to my prior knowledge in the field, I excelled in the course.

LUNAR BOT   2021-2022
Founder and Developer

- I was responsible for developing Lunar Bot, a Discord bot focused on selling digital products. The project achieved significant success, with over 1,000 simultaneously active stores and surpassing 35,000 users.

FELIPE ESTRELA
COURSES & CERTIFICATES

🌐 felipeestrela.com.br

Throughout my professional career, I've always strived to stay up-to-date and prepared for the challenges of the technology market. I've completed over 40 courses in various fields, with an emphasis on software development, systems architecture, agile methodologies, project management, and emerging technologies. Much of this training comes from recognized platforms such as LinkedIn Learning, where I explored in-depth content on Node.js, Java, Docker, relational and non-relational databases, as well as security and scalability practices in modern applications.

Furthermore, I've earned relevant certifications that demonstrate my commitment to excellence, such as Microsoft certifications focused on cloud solutions and development best practices, as well as PMI certifications, which reinforce my solid foundation in project management and agile methodologies—skills I apply daily to efficiently align technology and business. Because I believe that learning is a continuous process, I maintain a public repository with my complete collection of courses and certificates, which can be accessed through my GitHub repository: https://github.com/lipey1/courses-and-certificates. This space reflects my commitment to constantly evolving and preparing myself to contribute strategically to any project or team I'm part of.
