SUMMARY

Backend Developer with experience building and operating web systems, APIs and desktop applications. Focused on Node.js/TypeScript, databases and AI automation: agents, MCP and LLM integrations. Work on internal process automation, marketplaces and production digital products, with experience in high-volume platforms (35,000+ users and 1,000+ active stores). Software Engineering undergraduate (Biopark, graduating in 2027).

PROFESSIONAL EXPERIENCE

Hagap · **Full Stack Developer** 2023 - Present

- Development of web and desktop systems for internal process automation.
- Implementation of team management modules, invoice issuing and document organization.
- Custom forms and tailored operational workflows for internal teams.

MyGames · **Founder & Developer** 2022 - Present

- Architecture and development of a marketplace for game items, accounts and currencies (mygames.com.br).
- Owned backend, frontend, payment integrations, digital delivery and platform security.
- Ongoing operation and evolution of the product in production.

Ativa EPIS · **E-commerce Specialist** 2023

- Online inventory control with monitoring to prevent stockouts.
- Storefront maintenance: banners, layout tweaks and visual content updates.

Lunar Bot · **Founder & Developer** 2021 - 2022

- Discord bot for selling digital products.
- Operational scale: 35,000+ users and 1,000+ active stores simultaneously.
- Managed availability, performance and customer base growth.

EDUCATION

Biopark Educação · **Software Engineering (6th term)** 2024 - 2027

Colégio Estadual Jardim Gisele · **High School** 2020 - 2023

Biopark - Projeto Zero ao Um · **Top student - Class 2** 2021 - 2022

PROJECTS

MyGames - Marketplace for game items and accounts with payment and digital delivery. mygames.com.br
Galaxy CDN - CDN for assets, images and media with distributed caching. galaxycdn.com.br
Free Gemini API - API with sessions to integrate Gemini models into apps and automations. freegemini.felipeestrela.com.br
AllDrive - Unified workspace for Google Drive and S3, with fast sharing and storage management. alldrive.cloud
AstroHub - Platform and desktop app for secure automations, campaigns and Discord management. astrohub.neonstore.cloud
Frameclear - Web studio for removing logos and fixed areas from videos directly in the browser. frameclear.felipeestrela.com.br
GitHub - lipey1 - Public repositories: APIs, automation, integrations and open source tools.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, C#, Java, Go, PHP, SQL
Frontend	React, Next.js, Angular, Vue.js, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express, Django, Spring, REST APIs, GraphQL
AI & Automation	AI Agents, MCP, LLM Integration (Gemini/OpenAI), Process Automation, Puppeteer, Prompt Engineering
Data	PostgreSQL, MySQL, MariaDB, MongoDB, Redis (cache, sessions, queues), SQLite
Infra	Docker, Linux, Nginx, Microservices, AWS, Google Cloud, Git, CI/CD, RabbitMQ, Kafka
Tools	Insomnia, Postman, Electron, Puppeteer, Selenium, Figma

LANGUAGES

Portuguese: native

English: intermediate (technical reading and professional communication)

Spanish: fluent
